2 Year Warranty

The Mi-T-M Corporation has one of the best warranties in the industry. We stand behind everything we build. That's why it is important for us to select component suppliers that are as dedicated and innovative as we are. This means their warranty program must meet our standards. There have been times when we required engineering modifications to components, such as the pumps we install in our equipment, to improve warranties from suppliers.

For example, the Mi-T-M Pump Exchange Program provides pump replacement on our air compressors for the warranty period of two years from the date of purchase. It covers all pump problems with the exception of abuse or lack of basic maintenance. No other manufacturer offers this warranty. You will find all the details of this program in the owner's manual and warranty statement.
